## **Emergency shadow report**

because of a lack of human rights reporting

of the Report of the German Institute for Human Rights in the framework of Germany's third review in the Universal Periodic Review of the UN Human Rights Council 2018

and the report of the National Coalition on the implementation of children's rights

Dear Sir or Madam,

An emergency report on German state-report by self-defence is necessary, because a violation of international law is hidden within the state.

400 000 victims of institutionalized violence of the state have been abused and mistreated as underage persons and exploited through forced labour. They were withheld from rights for education.

The German state is responsible for the injury of its duty of supervision as against third party fault including government liability. The German state refuses to provide mechanism for reparation and recovery of dignity.

The victims informed the German government, the National Coalition and the Institute for Human Rights regarding missing proprietary rights (obligations to protect from the resolution 60/147 and article 39 of the Convention for the Rights of Children).

The free development of the personality of the victims is injured. State duty to protect and legal process does not exist. The victims live in a legal vacuum. The victims do not have an individual right of appeal in front of the United Nations.

If the victims stay under conditions which one can compare with conditions of euthanasia, they will die in average 30 years earlier as normal. When somebody does not reach the average age it means that he or she is killed.

The group of victims demands therefore the installation of a special court, which appoints legally binding the number of victims, the kind of crime und the persons in charge of guilt regarding international law. Such an installation is refused through German Government. and German Bundestag. ,

As the group of victims distrust the german Institute of Human Rights, which is installed yánd financed by the state, and the members of the National-Coalition, which work for the church or in youth welfare, because many of the crimes happened in facilities of the church, and the problematic of victims was ignored in reports, the group of victims uses the instrument of Emergency shadow report.

The victims demand the immediate implementation of the norms of article 39 of the Convention on the Rights of the Child. The installation of an Victims Compensation Act for underage people, all other demanded arrangements and mechanism for compensation for personal suffering to get reparation regarding the suffering and the adjustment of following damages. For legally binding rehabilitation the installment of a Special Criminal Court and for compliant in front of the United Nations, a Individual complaint , which is written in the 3. optional protocol to the Convention on the Rights of the Child .

Only through these mechanism the murder of the group of victims can have an end and the suspicion of of kind of genocid can be eliminated.

Its asked to hear the representation of the german state and to advice for the implemantation of the Human Rights.

The original German version of the complaint is attached.

Sincerely

Appendix: Evidence
